

# Suggested planned maintenance (Beta)

[help.fracttal.com/hc/en-us/articles/25597098214413-Suggested-planned-maintenance-Beta](https://help.fracttal.com/hc/en-us/articles/25597098214413-Suggested-planned-maintenance-Beta)

When creating an asset in the catalogs module, Fracttal One makes a recommendation of planned maintenance created by our team of specialists within our Library of maintenance plans for import. When the name of the asset is typed in when creating it, Fracttal One checks the database of available plans, suggesting to the user the planned maintenances that could be useful.

The screenshot shows the Fracttal One asset creation interface. On the left, there is a sidebar with navigation options: Assets, Equipment, Information (You have pending changes to save!), Details (General, Custom Form, Health Status (Beta), Financial, Third Parties, Spare Parts and Supplies). The main area displays a form for creating an asset. A notification banner at the top right of the form asks: "We have suggested planned maintenance for this asset, would you like to see them? Beta" with "Yes" and "No" buttons. Below this, a QR code is shown next to the "Is part of" dropdown menu. The "Nombre de equipo" field contains the text "Electric panel" and is highlighted with a red box. Other fields include "Code", "Fabricante", "Modelo", "Número de serial", "Otro 1", "Otro 2", "Barcode", "Priority", "Type", "Group 1", "Group 2", "Supplier", "Purchase date", "Hours of average daily use", and a "Visible to all" checkbox.

If you wish to see the suggested planned maintenances, just click on the "YES" option, and the platform will send you to a new window in which you will see both the list of suggested plans (with their compatibility percentage) and the general list with all the existing plans in your base.

When you choose one of the plans, you are immediately given the option to setup the planned maintenance linked to the asset:

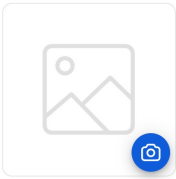

- Last WO date
- Setup triggers
- Setup subtasks

When the setup is completed and click on 'Save', the chosen planned maintenance is linked to the created asset.
