

Ask Tony

 help.fractal.com/hc/en-us/articles/24887010611597-Ask-Tony

The Artificial Intelligence Bot Add-on integrates into the platform to completely transform the user experience.

Key Benefits:

User-friendly interaction: Tony provides an intuitive and user-friendly interface, allowing users to communicate with the platform in a natural and effective way.

Continuous learning: Tony has the ability to continuously learn in order to offer personalized and meaningful support, adapting to your evolving needs.

Fast and accurate responses: With access to a vast database, Tony quickly responds to queries and information requests, streamlining the user's workflow.

Scope:

It is an invaluable resource that expands the horizon of possibilities for users. It can provide detailed information and clarify complex processes.

It represents a significant advancement in the Fractal One platform, offering a range of useful tools that enhance the efficiency and productivity of users in their daily maintenance activities.

Get ready to experience the revolution in maintenance with our Artificial Intelligence Bot!

Recommendations for using the Bot:

1. Use simple language:

Ask questions using clear and simple language. Avoid complex technical terms and opt for easy-to-understand expressions.
