

Do I need to buy servers or other software licenses in order to implement Fractal One?

 help.fractal.com/hc/en-us/articles/24986274567437-Do-I-need-to-buy-servers-or-other-software-licenses-in-order-to-implement-Fractal-One

No, with Fractal One, it is not necessary to acquire servers, operating system licenses, databases, or perform disk installations. Being a 100% cloud-based solution, all data storage and management are done centrally in the cloud.

This ensures that you can access your data quickly, securely, and from any device, anywhere and at any time, without the need to manage additional infrastructure.
