

IA assistant in Fractal One – Help Center

help.fractal.com/hc/en-us/articles/38104941037453-IA-assistant-in-Fractal-One

In Fractal One, the artificial intelligence assistant (**IA**) located in the top toolbar offers a range of features designed to facilitate interaction with the system and enhance the user experience.

This article will explain how to use the functionalities of this assistant to perform tasks such as answering general questions, consulting transactional information, and interacting via voice or images, optimizing operation management.

- **Access the IA assistant** - In the top toolbar of **Fractal One**, click the assistant icon to activate it. It will automatically open in the panel.

- **Ask a general question** - To get quick answers about the system, type your question in the input box. The IA assistant will respond with accurate information about system usage as requested.
- **Consult transactional information** - The IA assistant can access and display general data from transactions within Fractal One. Ask about work orders, maintenance, asset status, or transactional reports to get quick responses.

- **Interact by voice** - Activate the microphone by clicking the microphone icon located in the input box. Speak your question or request, and the IA assistant will respond or execute the desired action as indicated.

The image shows a dashboard with a Fractal AI chat interface overlay. The dashboard includes a date range selector (2025-06-16 / 2025-07-16) and several KPI cards: 46 WOs in Process, 4 WOs in Review, 21 Closed WOs, and 20 Pending Tasks. There are also two donut charts: 'Scheduled vs. Unplanned Tasks' (57.9% Planned, 42.1% Unplanned) and 'Compliance Percentage' (29.6% Closed WOs). The Fractal AI chat interface is titled 'Fractal AI' and displays a greeting: 'Hello, Jonas, how can I help you?'. It lists several suggested questions: 'Give me a detailed report of a work order', 'What requests need my urgent attention?', 'What tasks are at risk if I don't attend to them soon?', and 'How has my operation performed this month under maintenance?'. At the bottom of the chat interface, there is a text input field with the placeholder 'Pregunta lo que quieras' and a microphone icon. A red arrow points to the microphone icon, indicating that it should be clicked to activate voice interaction. Below the chat interface, there is a disclaimer: 'Fractal AI is experimental and may contain bugs. By continuing, you agree to the Terms and Conditions. Always verify the data before making decisions.'

Send images for analysis - If you need to send an image for analysis, click the image upload icon. The IA assistant will process the image and may generate reports or provide information based on the analysis of the submitted image.

Fractal AI

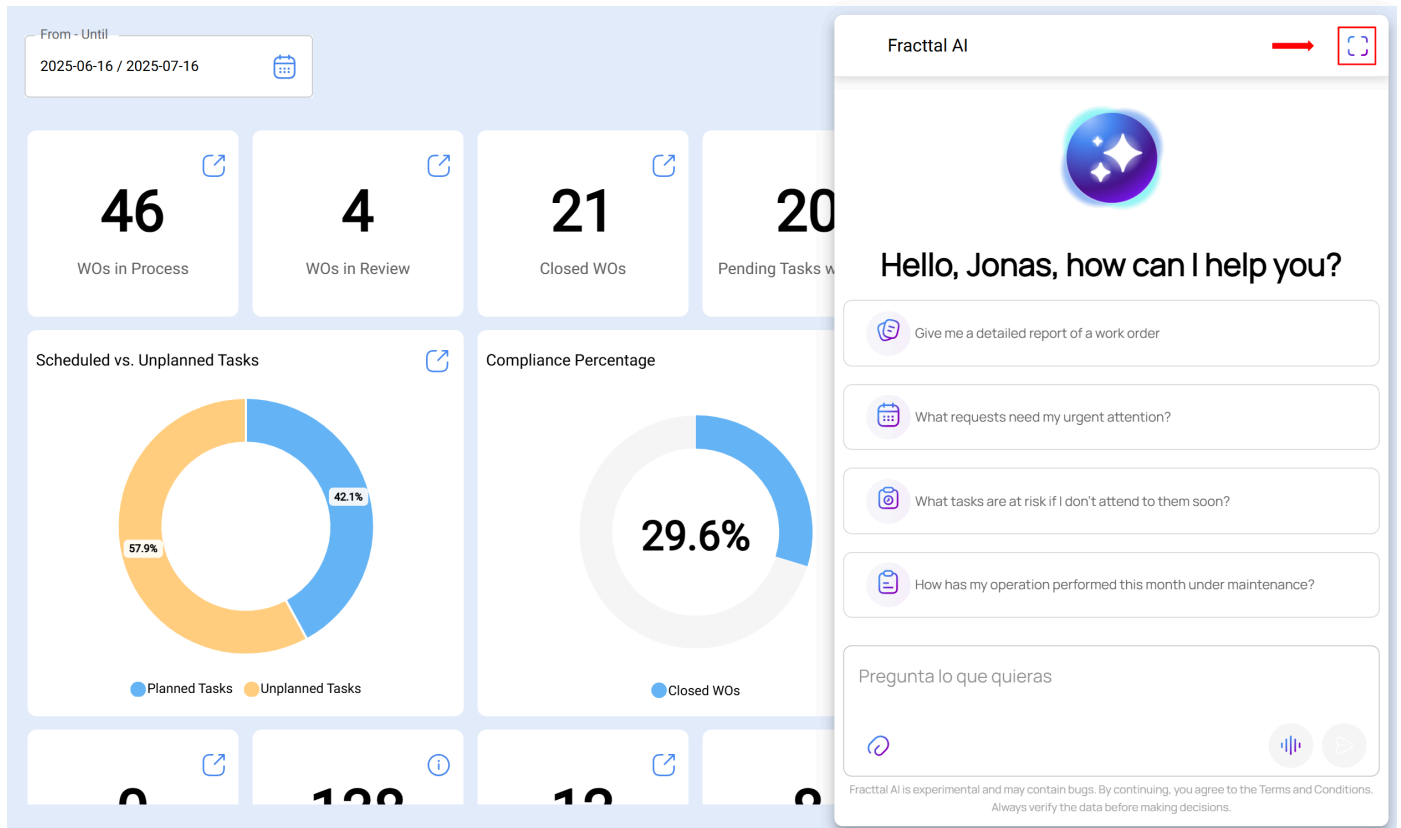

Hello, Jonas, how can I help you?

- Give me a detailed report of a work order
- What requests need my urgent attention?
- What tasks are at risk if I don't attend to them soon?
- How has my operation performed this month under maintenance?

Pregunta lo que quieras

Fractal AI is experimental and may contain bugs. By continuing, you agree to the Terms and Conditions. Always verify the data before making decisions.

Use in full-screen mode - To manage operations exclusively through IA, activate full-screen mode. This allows you to use the IA assistant without distractions from other interface elements, ideal for users who want an interaction focused solely on the IA.

Notes:

- When using the assistant, always verify data and actions before confirming to avoid record inconsistencies. Validate critical info and report unexpected behavior to help improve the system.
- **Data security:** Although the IA assistant is an efficient tool, make sure to follow best data security practices, especially when sending images or interacting with sensitive information.
