

# Auxiliary Catalogs (Compliance and Security) – Help Center

[help.fractal.com/hc/en-us/articles/41970385527565-Auxiliary-Catalogs-Compliance-and-Security](https://help.fractal.com/hc/en-us/articles/41970385527565-Auxiliary-Catalogs-Compliance-and-Security)

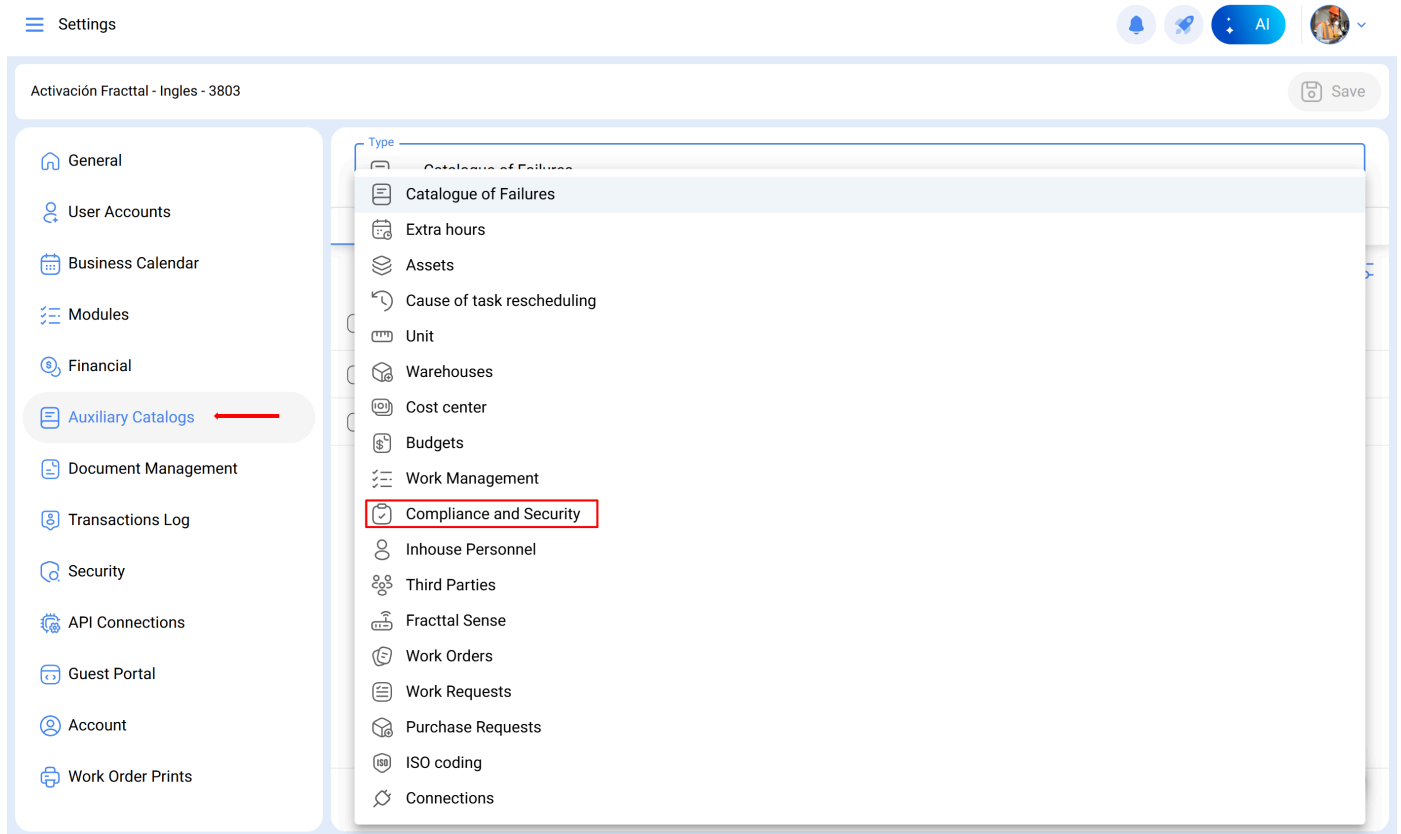

The auxiliary catalogs allow you to define the base structure used in the Compliance and Security submodule of Fractal One. From them, the types and groups used to organize the validation forms are configured.

## Access the Settings menu ▶ Auxiliary Catalogs ▶ Compliance and Security.

The screenshot displays the Fractal One dashboard interface. At the top left, there is a 'Dashboard' menu icon. The main dashboard area is divided into several sections:

- Summary Cards:** Five cards showing key metrics: 5 WOs in Process, 0 WOs in Review, 1 Closed WOs, 1 Pending Tasks with Delay, 3 Failures that Caused Damage, 2 Currently stopped assets, 0 Planned downtimes, and 2 Unplanned downtimes.
- Scheduled vs. Unplanned Tasks:** A donut chart showing 66.7% Planned Tasks (blue) and 33.3% Unplanned Tasks (orange).
- Compliance Percentage:** A donut chart showing 16.7% Closed WOs (blue).
- Work Orders:** A bar chart showing 6 WOs in Process, 1 Finished, and 1 Pending.
- Work Requests:** A section with a 'No data to show with these parameters' message.

On the right side, a user profile menu is open, with the 'Settings' option highlighted in a red box. Other options include Language, Dark Mode, Help and Technical Support, Change company, and Log out.

Within this catalog, it is possible to create or edit the elements that make up the structure of the forms. These configurations facilitate the classification of validations and make the use of the forms more consistent throughout the operation.

To add a new option to any of the lists, click on the (+) icon located at the bottom right of the screen and enter the corresponding description.

Description

Validation - preventive

The available options are:

## Type

- **Type** — defines the type of required validation.
- **Group 1** — optional category to group forms according to operational logic.
- **Group 2** — second optional category, used to further organize the forms.

Once the configuration is complete, save the changes. The catalogs will be available when creating or editing validation forms in the Compliance and Security submodule.
