

How to add a new reading?

help2.fractal.com/hc/en-us/articles/25021433347597-How-to-add-a-new-reading

To add a reading directly to the meter, just click on the module “Readings” to bring up an options menu.

The screenshot shows the configuration page for a meter named "Temperature DLW102 - Automóvil Aveo GT { DLW102 }". The page is divided into a left sidebar and a main configuration area. The sidebar contains a list of tabs: "General", "Dashboard", "Readings", "Alarms - Tasks Triggers", and "Linked elements". The "Readings" tab is highlighted with a red rectangular box. The main configuration area includes a toggle switch for "Enabled" (which is turned on), a "Depends on another meter" field (empty), an "Is part of" field (set to "Automóvil Aveo GT { DLW102 }"), a "Description Sensor / Meter" field (set to "Temperature DLW102"), a "Serial" field (empty), a "Unit" field (set to "Temperatura"), and a toggle switch for "Isn't a Counter / not Accumulator" (which is turned off). A "Save" button is located in the top right corner of the configuration area.

Then click on “+” to get the system to display a log window for the new reading.

Temperature DLW102 - Automóvil Aveo GT { DLW102 }

NEW METER READING 

Date

Reading

Reading as history, does not affect task triggers

Note: The “Reading as history, doesn’t affect task triggers” option is used to record old readings without affecting task activation since, if the option isn’t activated, the system won’t allow you to record readings lower than the last reading recorded in the system.
