

Quick actions from a mobile device.

help.fractal.com/hc/en-us/articles/25290550757005-Quick-actions-from-a-mobile-device

To begin using our quick actions from a mobile device, we must click on the dots that appear on the top right of the main screen that will open a menu with the actions option.

It will the open a window with the different quick actions that can be done from this option.

Each option is detailed below:

Location

Will open a blank location tab for us to upload a new one.

Equipment

Will open a blank location tab for us to upload a new one.

The screenshot shows a mobile application interface for 'Assets Equipment'. At the top, there is a navigation bar with a hamburger menu icon, the text 'Assets Equipment', a notification bell icon, and a three-dot menu icon. Below this is a sub-header 'General' with a back arrow on the left and a camera icon on the right. The main content area features a large QR code at the top. Below the QR code is a dropdown menu labeled 'Is part of' with a downward arrow and a circular refresh icon. Underneath is a text input field labeled 'NOMBRE' in red, which is currently empty and has a red border. A red error message below it reads 'Field 1 is too short (the minimum is 2 characters)'. Below the 'NOMBRE' field are four more text input fields: 'Code', 'MARCA', 'MODELO', and 'Serial', all of which are currently empty.

Unplanned Task

Will open our option that allows us to generate unplanned tasks directly from that section.

Do you know the asset?

Asset

Asset field contains a dropdown arrow and a QR code icon.

Meter Reading

Will take us to a window where we will select the equipment and meter for which we want to update information.

The image shows a mobile application interface for 'Meter Reading'. At the top, there is a back arrow and the title 'Meter Reading', along with a document icon. Below the title, there are four input fields: 'Asset' with a dropdown arrow and a QR/NFC icon, 'Meter' with a dropdown arrow, 'Date' containing the text '2025-04-16 10:17', and 'Value' which is currently empty. The interface is clean and uses a light color palette.

QR code and NFC Reader

Lastly, this action will activate the scanning and NFC card reading function.
