

What is the cloud disk and how to access the module? How to enter the Cloud Disk module?

help.fractal.com/hc/en-us/articles/24944665886861-What-is-the-cloud-disk-and-how-to-access-the-module-How-to-enter-the-Cloud-Disk-module

The Cloud Disk is a module where you can create folders and upload digital files so that they are always available when accessing your database. These files can be used as attachments both in your task plans and in the records of the Catalog module, making them easily accessible and manageable in different contexts within the platform.

How to enter the Cloud Disk module?

To access the Cloud Disk, you only have to drop down the menu that you will find in the upper left part of the main bar of the platform and click on "Cloud Disk".

Start

Catalogs

Warehouses

Work Management

Monitoring

Dispatcher

Business Intelligence

Cloud Disk

When you click on it, a new window will open where you will find all the folders and files stored on the cloud disk.

Cloud Disk
