

What are Auxiliary Catalogs and what are they used for?

 help.fracttal.com/hc/en-us/articles/41410594654349-What-are-Auxiliary-Catalogs-and-what-are-they-used-for

They are support structures that define types, classifications, and parameters used in different records on the platform. Their function is to ensure uniformity in data entry and to optimize the analysis and traceability of the data.

The screenshot shows the Fracttal platform's settings interface. The sidebar on the left lists various modules: General, User Accounts, Business Calendar, Modules, Financial, Auxiliary Catalogs (which is highlighted with a red arrow), Document Management, Transactions Log, Security, API Connections, Guest Portal, and Account. The main content area is titled 'Catalogue of Failures' and shows a list of failure types. A red box highlights this list. The failure types listed are: Extra hours, Assets, Cause of task rescheduling, Unit, Warehouses, Cost center, Budgets, Work Management, Compliance and Security, Inhouse Personnel, Third Parties, Fracttal Sense, Work Orders, Work Requests, Purchase Requests, ISO coding, and Connections.

Failure Type
