

Criar consumidores OAUTH

help.fractal.com/hc/pt-br/articles/26151637987853-Criar-consumidores-OAUTH

Para estabelecer conexões por meio da API do Fractal One, é necessário configurar um consumidor OAuth que permita autenticar e gerenciar o acesso à plataforma de forma segura.

1. Faça login e clique no menu no canto superior direito.

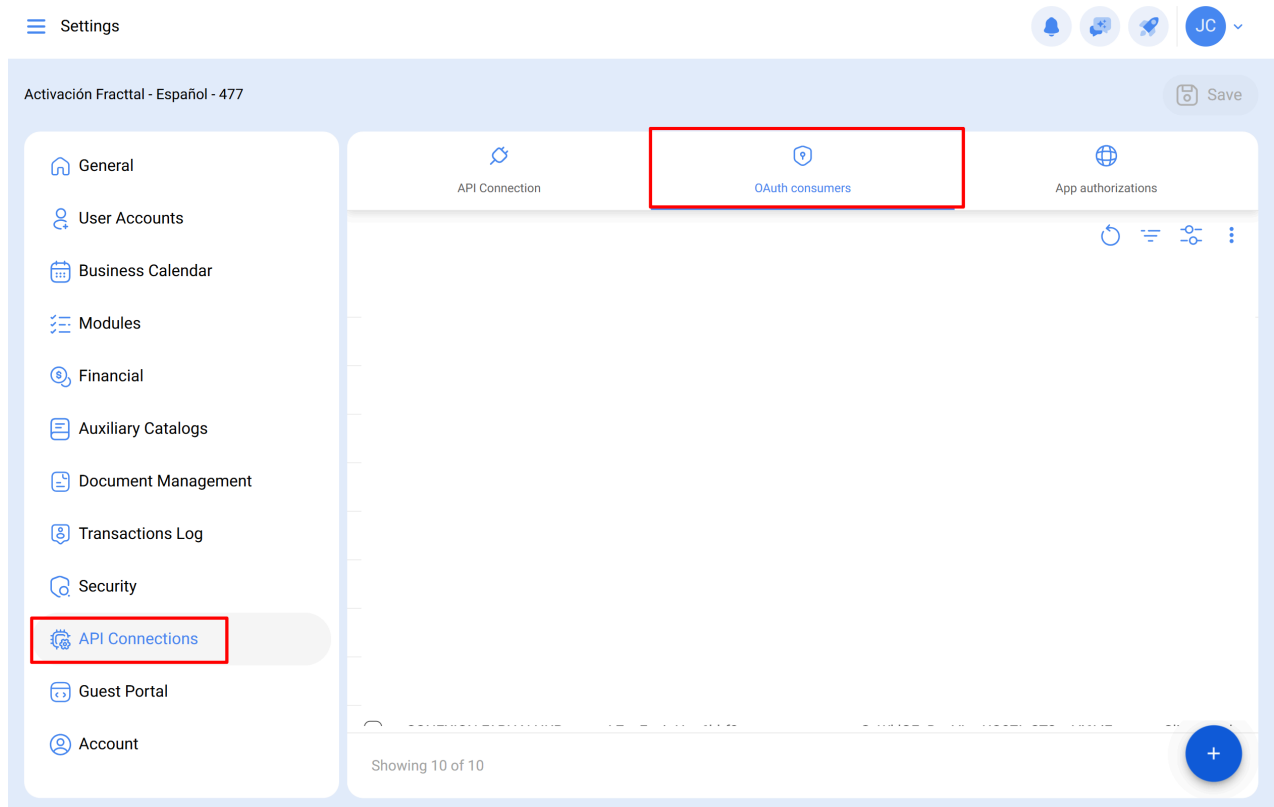

2. Selecione "Settings" (Configurações) no menu.

The screenshot shows a dashboard with a top navigation bar containing a hamburger menu, the word 'Dashboard', and a user profile dropdown. The user profile dropdown is open, showing the user's name 'Jonas Campos', a language selector set to 'Español', a 'Dark Mode' toggle, a 'Help and Technical Support' link, a 'Change company' link, and a 'Log out' button. The 'Settings' option is highlighted with a red rectangle. The dashboard itself features several widgets: four summary cards at the top (49 WOs in Process, 14 WOs in Review, 63 Closed WOs, 37 Pending Tasks with Delay), a 'Scheduled vs. Unplanned Tasks' donut chart (41.6% planned, 58.4% unplanned), a 'Compliance Percentage' donut chart (50.0% closed), and two bar charts on the right labeled 'Work Orders' and 'Work Requests'.

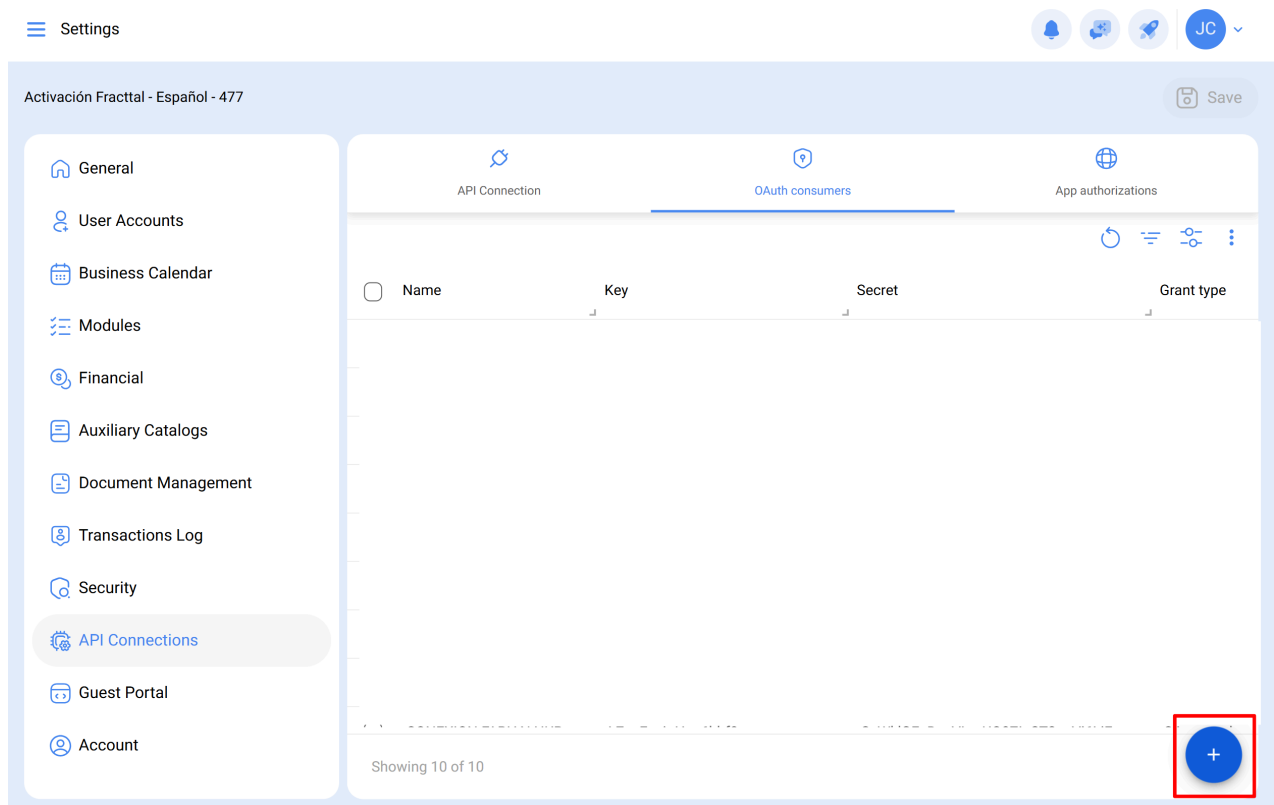

3. Na seção de configurações, clique na opção "Conexões de API" no painel do lado esquerdo.

The screenshot shows the 'Settings' page. The top navigation bar has a hamburger menu, the word 'Settings', and a user profile dropdown. The left sidebar contains a list of settings categories: General, User Accounts, Business Calendar, Modules, Financial, Auxiliary Catalogs, Document Management, Transactions Log, Security, API Connections, Guest Portal, and Account. The 'API Connections' category is highlighted with a pink rectangle. The main content area is titled 'Activación Fractal - Español - 477' and has a 'Save' button. It contains three tabs: 'API Connection', 'OAuth consumers', and 'App authorizations'. The 'API Connection' tab is active, showing a table with columns for 'Name', 'Key', 'Secret', and 'Grant type'. The table is currently empty. At the bottom of the page, it says 'Showing 10 of 10' and there is a blue circular button with a plus sign.

4. Nas configurações da API, clique em “Consumidores OAuth”.

5. Clique no botão “+” no canto inferior direito para adicionar um novo consumidor.

6. Configure os campos conforme mostrado na imagem. Aqui, o mais importante são os “[Grupos de permissão](#)” que criamos anteriormente para que, no momento de estabelecer a comunicação, não tenhamos problemas para acessar o módulo com o qual desejamos interagir.
