

Types of Work Orders

help2.fractal.com/hc/en-us/articles/24944901226509-Types-of-Work-Orders

A work order can be of a Planned nature (coming from an already established scheduled task plan) or Unplanned (coming from a work order request or some ad-hoc activity not contemplated in a task plan). For this reason, 2 different ways of managing work orders are required.

- Planned work orders
- Unplanned work orders

It should be noted that in most organisations and industries, up to 90% of all work orders generated will be Unplanned.
