Advanced APIs

help.fracttal.com/hc/en-us/articles/25054645108877-Advanced-APIs

Fracttal Advanced API (or advanced APIs) are a group of APIs that offer advanced characteristics and that is offered as an additional add-on.

These APIs allow the user to perform actions that are part of the scope or function of Fracttal as a CMMS.

These APIs are:

(PUT) Update a task within a WO

- (POST) Create an unscheduled task
- (POST) Create a work order
- (GET) Query work order attachments

(GET) View work request attachments

(POST) Create a pending task from a work request

Note: The advanced APIs are part of the Advanced APIs add-on.
