The screenshot displays the 'Assets' management interface for 'Equipment'. At the top, there is a search bar and user profile 'JC'. Below, a table lists equipment items with columns for 'Enabled', 'Out of Service', 'Description', 'Code', and 'NOMBRE'. A dropdown menu is open on the right, with 'Fields Configuration' highlighted in red. The table contains 14 rows of equipment data.

The fields configuration option allows the user to customize certain parameters in the Assets module by, for example, adding or removing Column Headers (Fields) from the Asset List View. Additionally, it allows the user to create the "description" field of the assets according to the selected concatenation.

How to configure fields?

To configure fields, you have to access the list of the type of asset whose fields you want to modify (for example locations, Equipment, Tools, Digital or Spare Parts).

When you click on fields configuration, the system will show a new window where you can modify the fields shown and create the description field when you select from the available fields.

The screenshot shows the 'Assets Equipment' interface. On the left, there is a table of equipment with columns for 'Enabled', 'Out of Service', and 'Description'. The 'Fields Configuration' panel on the right is highlighted with a red box and contains the following fields:

- Name: NOMBRE
- Make: MARCA
- Model: MODELO
- Serial number: SERIAL
- Extra 1: GARANTIA
- Extra 2: CAPACIDAD DE ALMACENAMIENTO
- Description: A dropdown menu with options: MARCA, Code, NOMBRE, Serial.

The fields that can be edited are the following:

- **Name**
- **Maker**
- **Model**
- **Serial Number**
- **Extra 1**
- **Extra 2**

Once the configuration is complete, click on the save button to implement the changes.

Note: Except for locations, the description field can be created for any type of asset registered on the platform.
