

How to delete imported data? – Help Center

help.fractal.com/hc/en-us/articles/24909912562317-How-to-delete-imported-data

To delete data that has been imported into Fractal One, you need to access the module where the import was performed and open the additional options menu.

The screenshot shows the Fractal One interface. At the top left, there is a navigation menu with 'Assets' and 'Equipment'. A search bar is located at the top right. Below the navigation, there is a header for the 'Equipment' module with a refresh icon and a menu icon. The main content area displays a table with the following columns: 'Enabled', 'Out of Service', 'Description', 'Code', 'Nombre', and 'Fabricante'. The table contains one row of data: 'Yes', 'No', 'Horno Industrial', 'HOR-001', 'Horno Industrial', and 'Acme'. At the bottom left, it says 'Showing 1 of 1'. At the bottom right, there is a blue circular button with a white plus sign.

Enabled	Out of Service	Description	Code	Nombre	Fabricante
<input type="checkbox"/>	<input type="checkbox"/>	Horno Industrial	HOR-001	Horno Industrial	Acme

Then click on “**delete imported data**” so that the system requests the import code that was generated at the time of import (this code was sent by email to the user who performed the import), in order to finally validate the deletion process and proceed with erasing the data.

- Open PDF
- Export
- Bulk export data
- Print QR
- Import
- Delete Imported Data**
- Fields Configuration
- Clone Asset
- Batch Edition

Note: The code will only be valid if, after the import, no edits or deletions have been made to the imported assets.
