

In my company, we have several user profiles. Does Fractal have role-based access control to separate access permissions? (Admins, power users, users, etc.)

help2.fractal.com/hc/en-us/articles/24987161073421-In-my-company-we-have-several-user-profiles-Does-Fractal-have-role-based-access-control-to-separate-access-permissions-Admins-power-users-users-etc

Yes, and it is 100% configurable from the settings module. Fractal has predefined user groups. It also offers the possibility of creating custom user groups with their respective permissions and accesses.
