

Automatic Location Update in WOs and Requests

help.fracttal.com/hc/en-us/articles/35644147004941-Automatic-Location-Update-in-WOs-and-Requests

Fracttal One offers an option in the Configuration module > Modules > Assets that allows users to enable automatic synchronization of asset locations. When this functionality is enabled, any changes in the location of an asset will be immediately reflected in the associated Work Orders and Work Requests, without requiring manual intervention.

How to enable automatic updates

1. Access the Settings module from the main menu.

2. Go to Modules > Assets and locate the option to Automatically Update WO's and requests when asset location changes.

Mark Custom Form as mandatory ☐

Automatically update work orders and requests when the location's position is edited ☒

This functionality ensures that changes to asset locations are automatically updated in all Work Orders and Work Requests. It improves accuracy and traceability, preventing data inconsistencies and facilitating maintenance management.
