

What is a CMMS such as Fracttal One?

 help.fracttal.com/hc/en-us/articles/24967537065229-What-is-a-CMMS-such-as-Fracttal-One

Fracttal One is an advanced asset management solution that combines the capabilities of a CMMS (Computerized Maintenance Management System) and an EAM (Enterprise Asset Management) software, integrating the mobility of an app and the immediacy of the Internet of Things (IoT). With this platform, you can control all of your company's assets from a single location.

This intelligent maintenance platform, fully cloud-based, is designed to provide an intuitive and accessible user experience. Fracttal One enables the control of company assets at any time and from any location, offering an efficient and secure solution.

Maintenance Management Features

With Fracttal One, organizations can plan, organize, and execute maintenance for various equipment, manage suppliers, control human resources, manage inventory of parts and spares, and manage expenses, budgets, emergencies, and warranties. All of this is done with powerful indicators and KPIs through a fast and user-friendly web interface.

Mobile Access and Field Management Optimization

Fracttal One offers a fully mobile version in addition to the desktop version, allowing personnel working off-site to access the platform from their mobile devices. This enables them to receive alerts, consult maintenance and inspection routes, and perform tasks directly through the app, thereby optimizing maintenance and inspection management in the field.
