# How to connect Fracttal One with Power BI?

✦ **help.fracttal.com**/hc/en-us/articles/25231661913229-How-to-connect-Fracttal-One-with-Power-BI

To connect to Power BI it is necessary to access Fracttal, go to the **settings module** >> **API connection** and generate the **API Key** data.

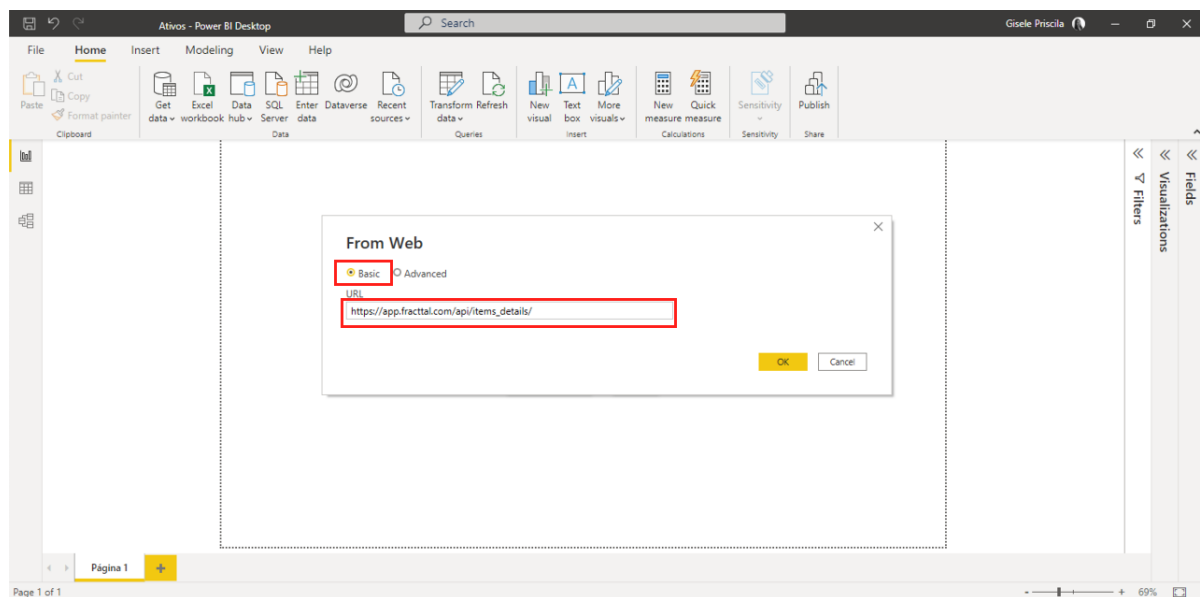

NOTE: Once the information is generated, it must be saved in a notepad, because if you generate it again, the Secret API will be changed for security reasons.

Direct Connection

1. Access **Power BI Desktop** > click on **get data** > **Web.**

2. A window will open that tells us "**FROM WEB**" in which we must enter the URL of the API query

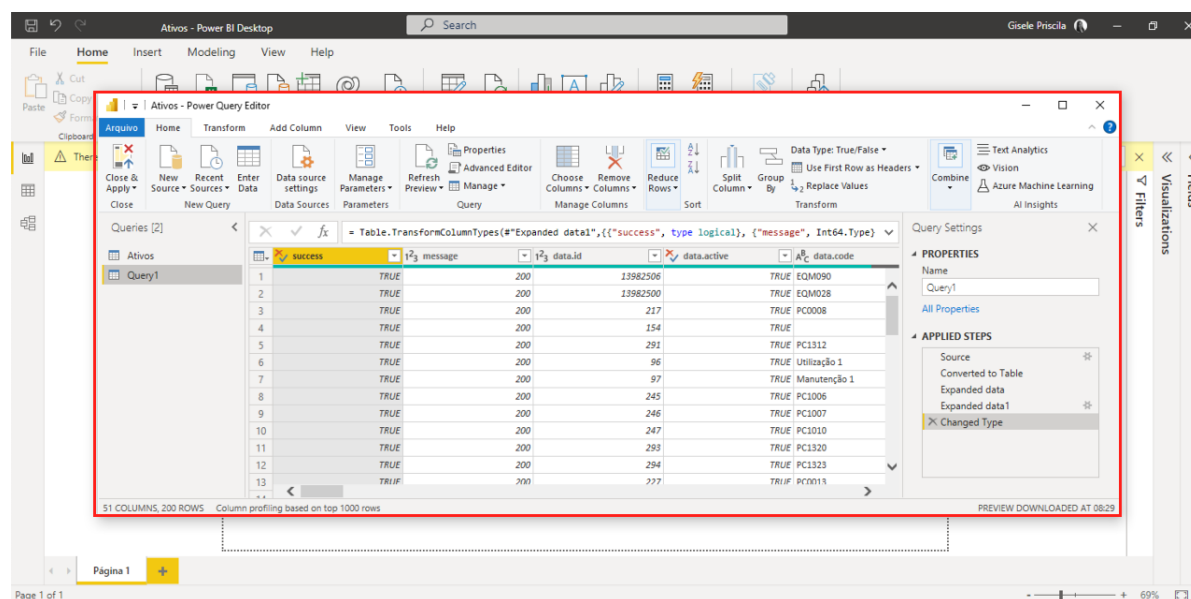

NOTE: To learn more about APIs, click **here.**

3. We must go to "**BASIC**", in the user name field enter the "**API Key**", in the Password field enter the "**API Secret**", then select the API we are going to query and finally select "**Connect**".

4.

5. Once the previous window loads, it shows us the details of the query made.
