

How to switch access between different companies in Fractal One? – Help Center

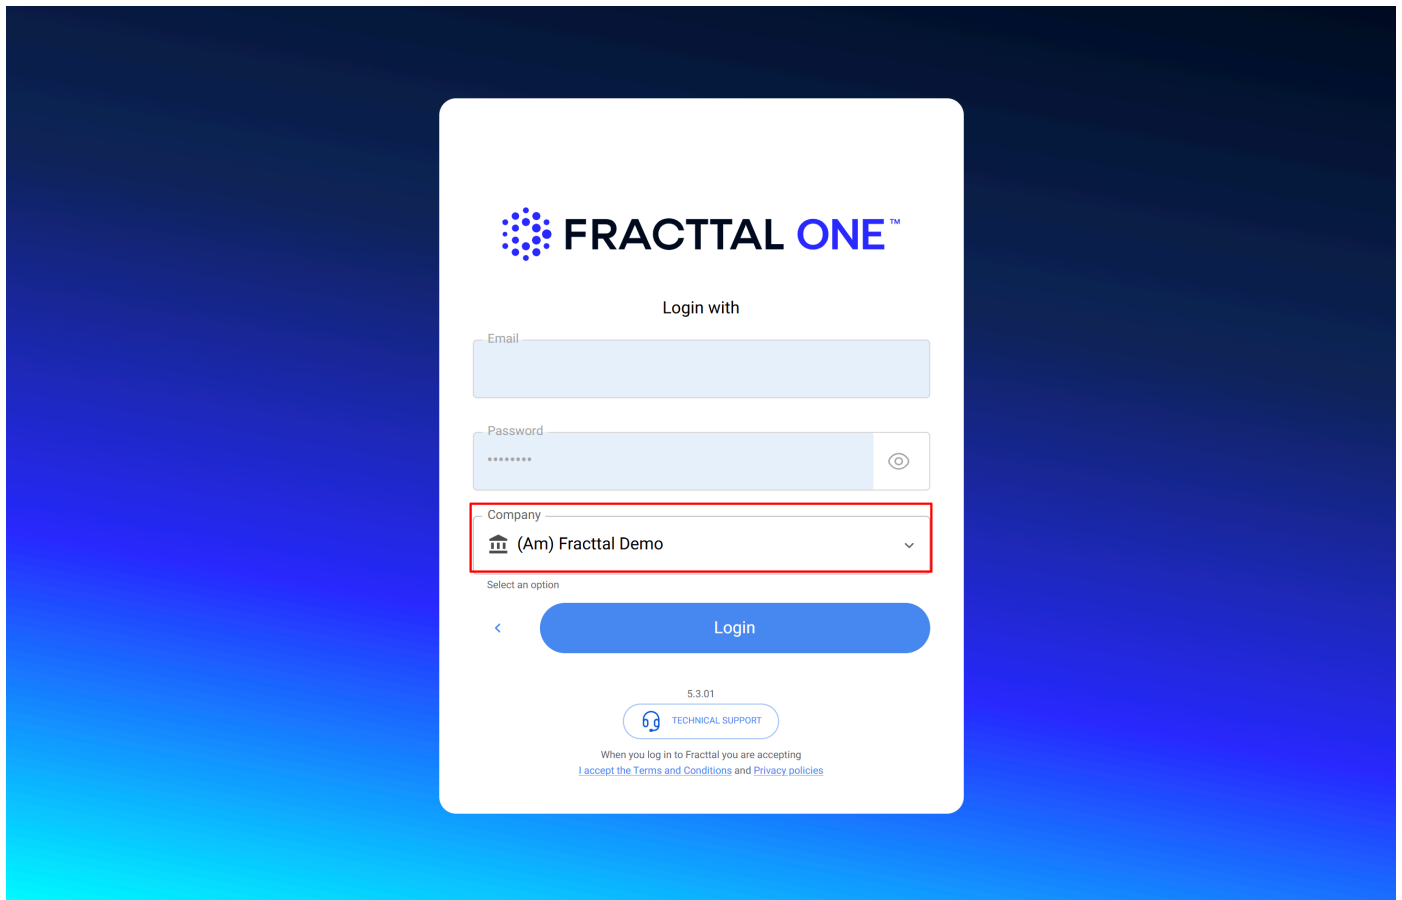

help.fractal.com/hc/en-us/articles/37957873727629-How-to-switch-access-between-different-companies-in-Fractal-One

For users managing multiple companies, switching between them within **Fractal One** makes it easier to manage data specific to each registered company. Switching between companies allows you to view data efficiently and without complications.

Procedure:

Company selection upon login:

When logging in, on the start screen, a company selection menu will be displayed. Here you can choose the company you want to manage at the time of logging in.

Access the company selection menu:

If you are already inside the platform, locate the company selection menu at the top or side of the interface. This menu allows you to switch between available companies without needing to exit the system.

Change company

Log out

Display the list of available companies:

By clicking on the selection menu, a list of companies you have access to will be displayed.

Select the company

Choose the company you want to view. The data and modules corresponding to that company will load automatically.

Confirm the change

In some cases, the system may ask you to confirm the company change. Confirm to complete the process.

The company change is made **immediately** and reflects the selected company, adjusting the data shown on the interface.
