

"Related Assets" tab on the asset record

help.fracttal.com/hc/en-us/articles/45638365645965--Related-Assets-tab-on-the-asset-record

The **"Related Assets"** tab in an asset's details allows you to view the immediate child assets (first level) directly from the main asset's record. This feature simplifies hierarchical navigation between equipment and sub-equipment without needing to use tree views or external filters, offering a more direct way to manage relationships between assets.

The screenshot shows the 'Related Assets' tab for a 'Manufacturing plant { MNF-P1 }'. The interface includes a sidebar with navigation options: General, Custom Form, Health Status, Third Parties, Spare Parts and Supplies, **Related Assets** (highlighted with a red box), and Historical. The main content area displays a table of related assets:

<input type="checkbox"/>	Code	Description ↑	Asset Type	Group	Group 1
<input type="checkbox"/>	<input type="radio"/> MNF-P102	MANUFACTURING PLANT 2 { MNF-...	Locations		
<input type="checkbox"/>	<input type="radio"/> MNF-P103	MANUFACTURING PLANT 3 { MNF-...	Locations		
<input type="checkbox"/>	<input type="radio"/> MNF-P104	MANUFACTURING PLANT 4 { MNF-...	Locations		
<input type="checkbox"/>	<input type="radio"/> PP-0112	{ PP-0112 } PRODUCTION PLANT	Equipment		

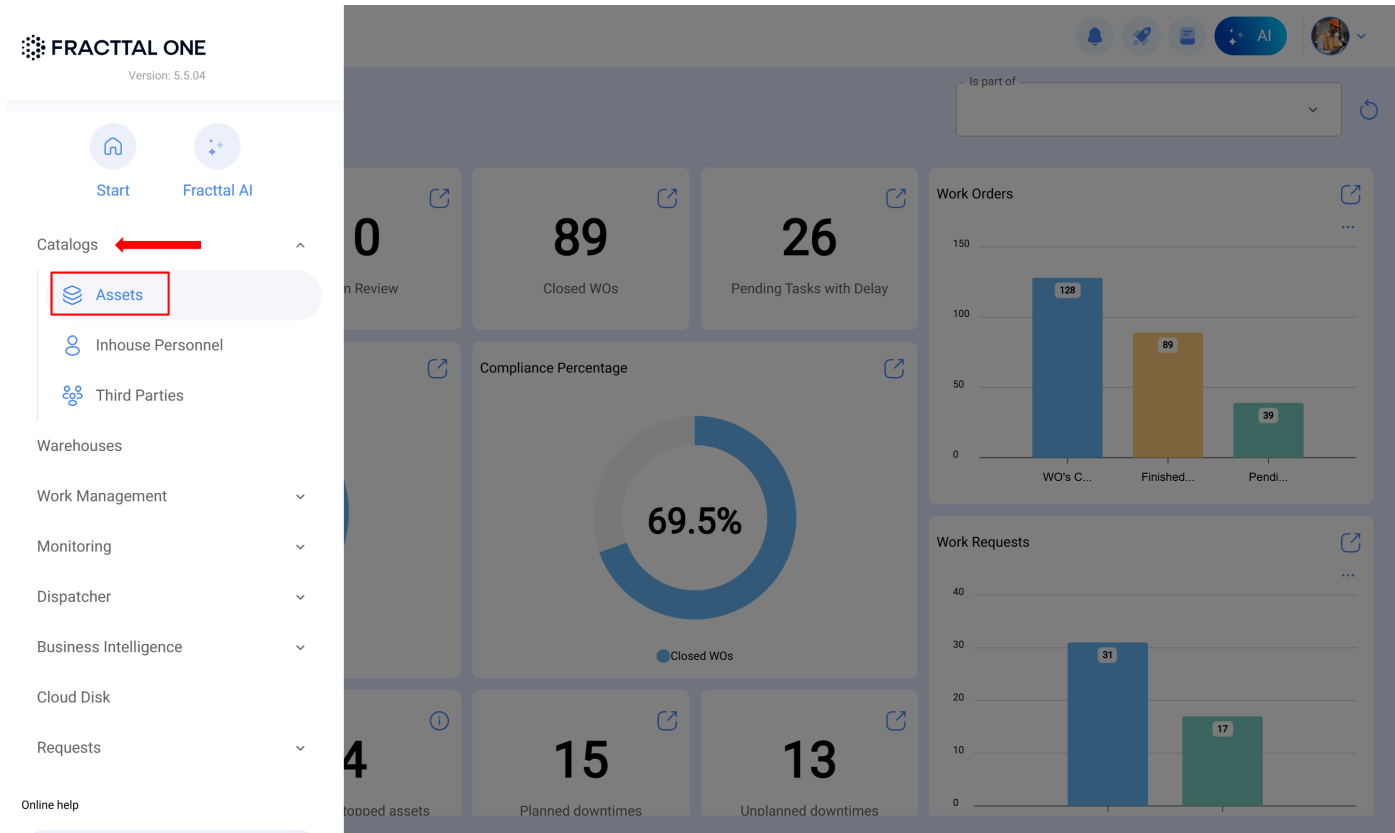

Showing 4 of 4

Note: This tab only appears when the asset has directly associated child assets and includes exclusively the first-level child assets.

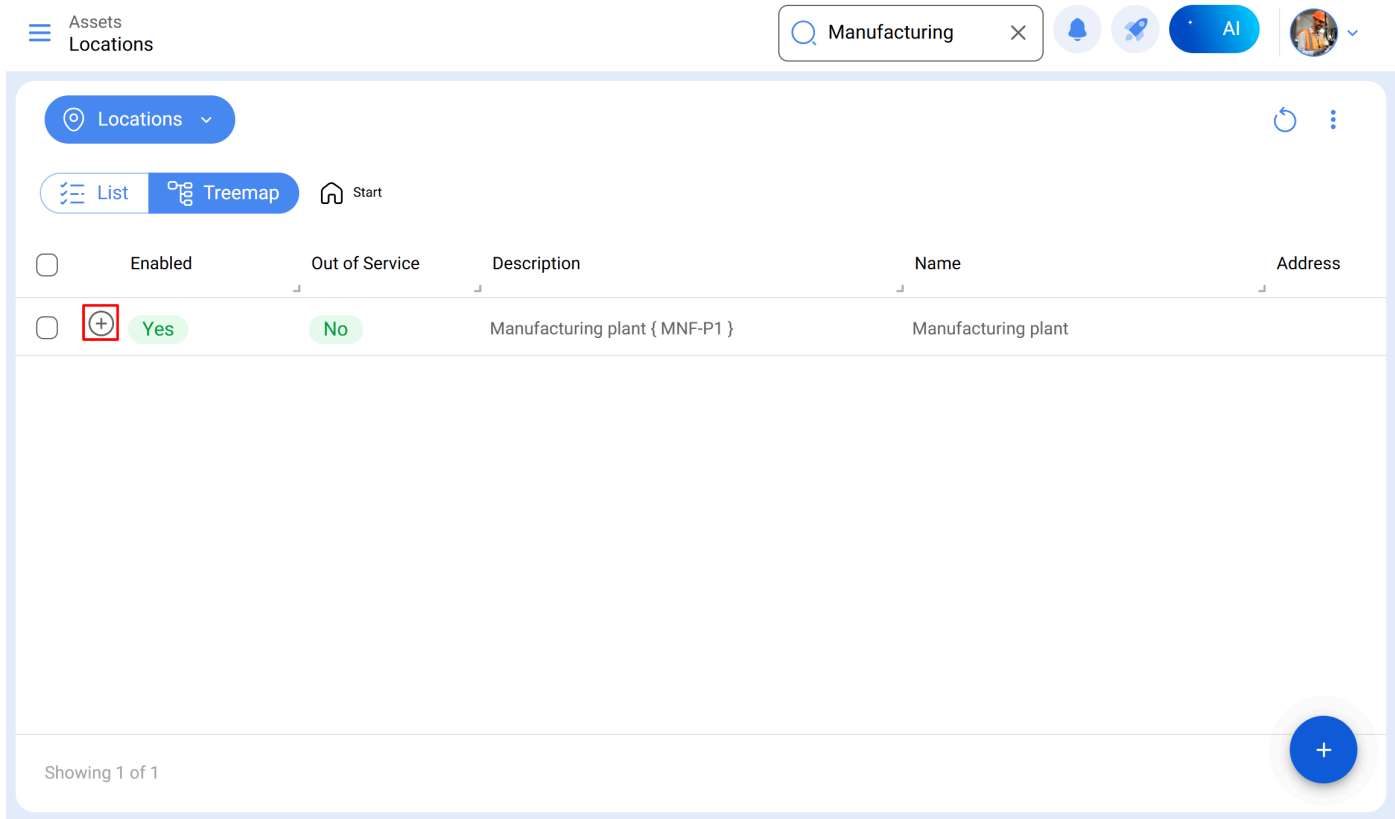

Steps to use the "Related Assets" tab

Step 1: Access the Parent Asset Details

1. Go to: **Assets** → **[Select Parent Asset]**

Verify that the asset has previously associated sub-equipment or child assets.

The "Related Assets" tab will automatically appear in the asset detail tab bar.

<input type="checkbox"/>	Code	Description ↑	Asset Type	Group
<input type="checkbox"/>	📍 MNF-P102	MANUFACTURING PLANT 2 { MNF-...	Locations	
<input type="checkbox"/>	📍 MNF-P103	MANUFACTURING PLANT 3 { MNF-...	Locations	
<input type="checkbox"/>	📍 MNF-P104	MANUFACTURING PLANT 4 { MNF-...	Locations	
<input type="checkbox"/>	📍 PP-0112	{ PP-0112 } PRODUCTION PLANT	Equipment	

Showing 4 of 4

2. Click the **"View"** icon in the actions column.

The screenshot shows a web application interface for asset management. At the top, there are navigation elements: a hamburger menu, 'Assets', 'Locations', a notification bell, a rocket icon, a blue 'AI' button, and a user profile icon. Below this is a breadcrumb trail: 'Manufacturing plant { MNF-P1 }' with a 'Save' button. A left sidebar contains menu items: 'General', 'Custom Form', 'Health Status', 'Third Parties', 'Spare Parts and Supplies', 'Related Assets' (highlighted), 'Historical', 'Attachments', and 'Document Management'. The main area displays a table with columns: 'Code', 'Description', 'Asset Type', and 'Group'. The table contains four rows of data. The first row is highlighted with a red box, indicating it is selected. The table footer shows 'Showing 4 of 4'.

<input type="checkbox"/>	Code	Description ↑	Asset Type	Group
<input checked="" type="checkbox"/>	MNF-P102	MANUFACTURING PLANT 2 { MNF-...	Locations	
<input type="checkbox"/>	MNF-P103	MANUFACTURING PLANT 3 { MNF-...	Locations	
<input type="checkbox"/>	MNF-P104	MANUFACTURING PLANT 4 { MNF-...	Locations	
<input type="checkbox"/>	PP-0112	{ PP-0112 } PRODUCTION PLANT	Equipment	

3. The system redirects to the selected child asset's details, maintaining the navigation history to return to the parent asset.
