

UTC Time Zone

help.fractal.com/hc/en-us/articles/24916719037709-UTC-Time-Zone

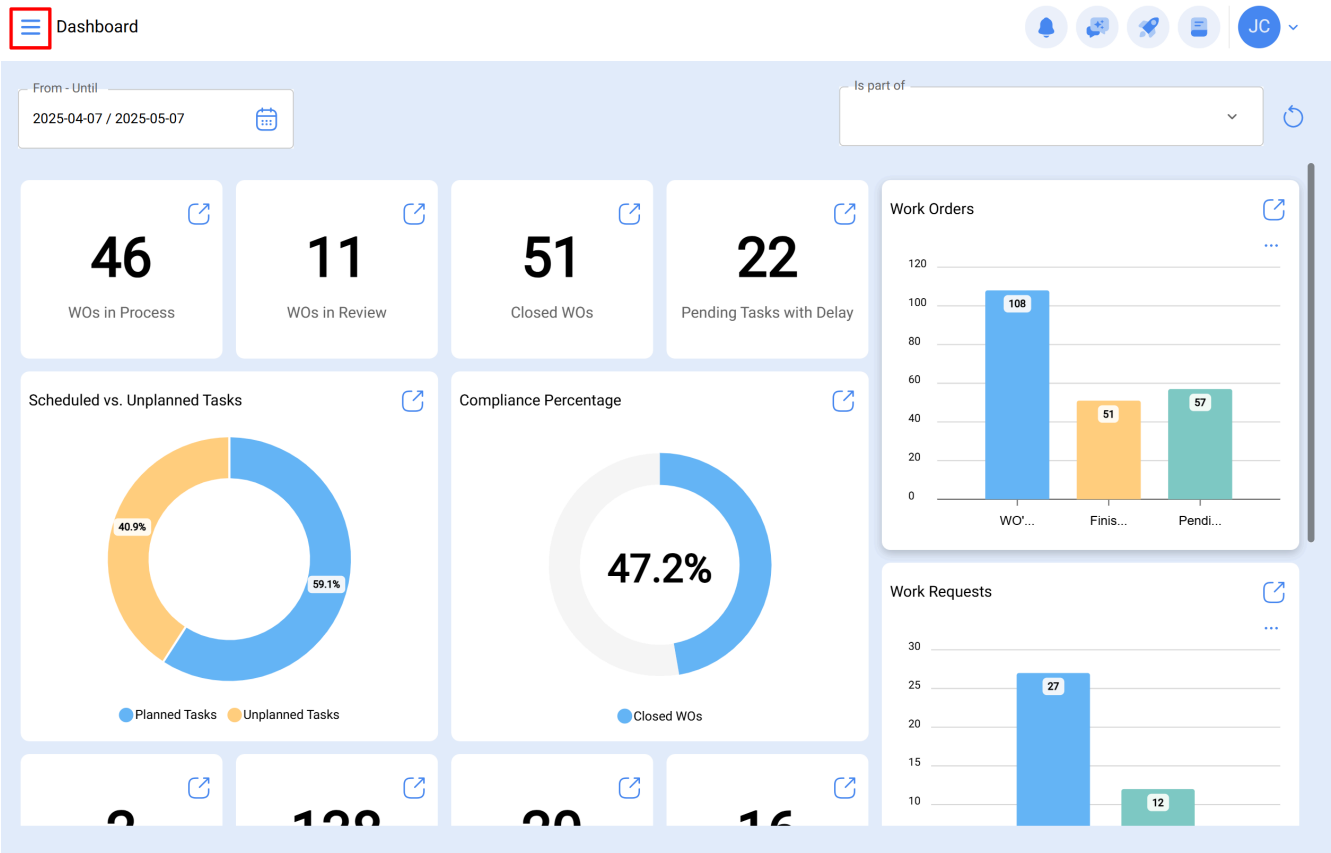

Fractal One uses time zones supported by **IBM** and validated according to the **ISO 8601** standard, ensuring accuracy in asset and task management. This guarantees that scheduled tasks are performed without errors that affect operation.

The platform allows customizing the time zone from a predefined list, avoiding errors in dates and assignments. **Choosing the appropriate time zone according to the user's location ensures precise management, even with multiple locations and time zones.**
