

Suggested planned maintenance

 help.fractal.com/hc/en-us/articles/25597098214413-Suggested-planned-maintenance

When creating an asset in the catalogs module, Fractal One makes a recommendation of planned maintenance created by our team of specialists within our Library of maintenance plans for import. When the name of the asset is typed in when creating it, Fractal One checks the database of available plans, suggesting to the user the planned maintenances that could be useful.
