

# Fields Configuration

help2.fractal.com/hc/en-us/articles/25066622375309-Fields-Configuration

The screenshot displays the 'Assets' module interface. At the top, there is a search bar and a navigation menu. The main content area shows a table of assets with columns for 'Habilitado', 'Fora de serviço', 'Descrição', 'Code', and 'Nombre de equipo'. A dropdown menu is open over the table, listing various actions such as 'Open PDF', 'Export', 'Bulk export data', 'Print QR', 'Import', 'Delete Imported Data', 'Fields Configuration' (highlighted with a red box), 'Clone Asset', and 'Batch Edition'. The 'Fields Configuration' option is the focus of the document.

The fields configuration option allows the user to customize certain parameters in the Assets module by, for example, adding or removing Column Headers (Fields) from the Asset List View. Additionally, it allows the user to create the "description" field of the assets according to the selected concatenation.

## How to configure fields?

To configure fields, you have to access the list of the type of asset whose fields you want to modify (for example locations, Equipment, Tools, Digital or Spare Parts).

When you click on fields configuration, the system will show a new window where you can modify the fields shown and create the description field when you select from the available fields.

The screenshot displays the 'FIELDS CONFIGURATION' interface. On the left, a table lists equipment with columns for 'Habilitado', 'Fora de serviço', 'Descrição', and 'Code'. On the right, a configuration panel allows editing fields. The fields shown are:

- Name
- Make
- Model
- Serial number
- Extra 1 (Physical Location)
- Extra 2 (Building Functional Group)
- Description (with a dropdown menu containing Code, Name, and Make)

The fields that can be edited are the following:

- **Name**
- **Maker**
- **Model**
- **Serial Number**
- **Extra 1**
- **Extra 2**

Once the configuration is complete, click on the save button to implement the changes.

**Note:** Except for locations, the description field can be created for any type of asset registered on the platform.
