How to configure your resources by iteration?

help.fracttal.com/hc/en-us/articles/24946422001933-How-to-configure-your-resources-by-iteration

Just as it is possible to establish subtasks by iterations, it is also feasible to define directly in a task list which resources will be used according to each iteration.

To add resources according to iterations, just add a resource to the task list in the normal way.

Access the main menu, then go to the "Work Management" module and select the "Planned Maintenance" option.

When viewing the list of plans in your database, identify and click on the task plan you wish to modify.

Work Management Planned Maintenance

Save ← prueba o = ≈ : 向 General Configured... Priority Estimated Duration Group 1 Description Task type Group 🖅 Task Plans ා ඵ 🤶 Assets Linked prueba Yes Prueba PRUEBA Medium 10mins Showing 1 of 1

Once the task is selected, an editing sidebar will open, displaying details such as general data, subtasks, resources, and attachments. Next, select the **"Resource"** option.

Work Management Planned Maintenance					← Edit			
← prueba					General	Sub Tasks	Resources	() Attachments
G General								0 = \$
3≣ Task Plans		Description	Configured	Priority	ACEITE DE PI	RUEBA { ACEITE DE P	RUEBA }	
Sector Linked	00	prueba	Yes	Medium	Qty: Type: Unit Cost: Total cost: Iterations:	1 LITROS Inventory \$ CLP 0,00 \$ CLP 0,00		
					Showing 1 of	1		

Then, when selecting the added resource (it can be an inventory, human resource or service type), an editing bar will be enabled.
