

UTC Time Zone

help.fracttal.com/hc/en-us/articles/24916719037709-UTC-Time-Zone

Fracttal One uses time zones supported by IBM and verified with ISO 8601 to ensure accuracy in asset and task management.

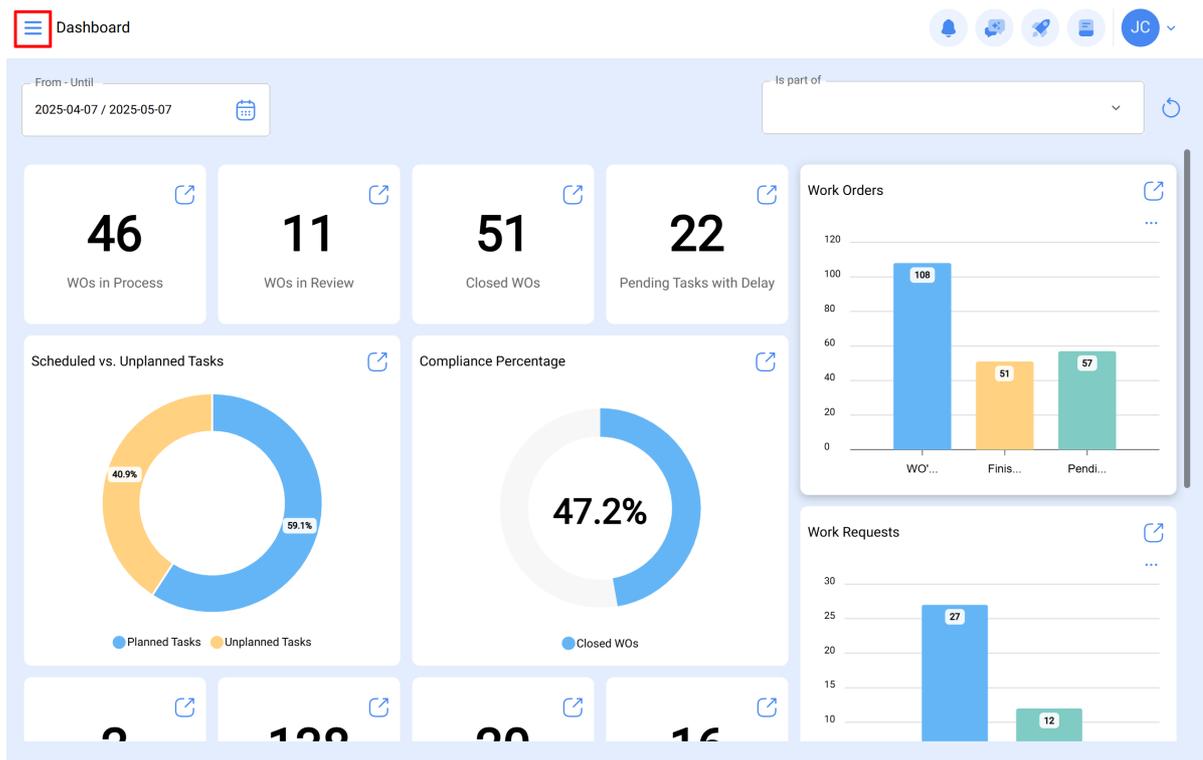

The platform allows users to customize their time zone according to a provided list. This setting is essential to ensure that the scheduled task dates are calculated correctly and to avoid errors in task creation.

Selecting the appropriate time zone for individual needs ensures accuracy in asset and task management, taking into account different locations and time zones.

TIME ZONE 2025

How to set the time zone from the configuration module?

1. At the top right, click on the menu where your name appears.

2. Click on "Settings".

The screenshot shows a dashboard with a top navigation bar containing a hamburger menu and the text "Dashboard". On the right side, there is a user profile dropdown menu for "Jonas Campos" (JC) with the text "Activación Fractal - Esp...". The "Settings" option in this menu is highlighted with a red rectangle. The dashboard itself features several widgets: a date range selector for "2025-04-07 / 2025-05-07", four KPI cards (46 WOs in Process, 11 WOs in Review, 51 Closed WOs, 22 Pending Tasks with Delay), a donut chart for "Scheduled vs. Unplanned Tasks" (40.9% Planned, 59.1% Unplanned), a gauge chart for "Compliance Percentage" at 47.2%, and two bar charts for "Work Orders" and "Work Requests".

3. On the left side, click on "General".

The screenshot shows the "Settings" page for "Activación Fractal - Español - 477". On the left side, there is a sidebar menu with the "General" tab highlighted by a red rectangle. The main content area contains a profile picture placeholder, a logo, and various form fields for company information: Code (RFC10829120), Name (Activación Fractal - Español - 477), Email, Currency (Chilean Peso), Thousands separator (.), Address, City, State, Country (Colombia), and Zip code (28108). There is also a map section with a search bar and a map showing the location of "Inacap Apoquindo". At the bottom, there are fields for Time zones UTC, Latitude, and Longitude.

4. Click on "UTC time zones".

Note: When modifying or editing the "Work Calendar" or the "UTC Time Zone" from the configuration module, all rescheduled dates for pending tasks will be reset by the system. By default, they will revert to the originally calculated date for each pending task.

The screenshot shows the same 'Activación Fractal' settings page as above, but with a 'Confirm' dialog box overlaid in the center. The dialog box contains the following text: 'You are modifying the time zone. Once the confirmation is made, all tasks that have been rescheduled will automatically return to their originally calculated date, Do you want to continue?'. There are 'No' and 'Yes' buttons at the bottom of the dialog box.
